

TRACING THE GROWTH OF THE GLOBAL COMMUNITY; A POPULATION FORECASTING ANALYSIS.

Te world's population is more than three times larger than it was in the mid-twentieth century.The population growth is rapidly increasing now-a-days.Each and everyone must notice the reality and understand the situation.The global population reached 8.0 billion in mid-November 2022from an estimated 2.5 billion people in 1950,adding 1 billion people since 2010 and 2 billion since 1988.The world's population is expected to increase by nearly 2 billion persons in the next 30 years,from the current 8 billion to 9.7 billion in 2050s and could peak at nearly 10.4 billion in the mid-2080s.

This dramatic growth has been driven largely by increasing numbers of people surviving to reproductive age,the gradual increase in human lifespan ,increasing urbanisation ,and accelerating migration . Major changes in fertility rate have accompanied this growth . these trends will have far-reaching implications for generations to come.

The population growth is now reached a peak.Every person should analyse the reality and follows the government rules.
